PROFESSIONAL PROFILE

Fullstack Developer focused on the JavaScript ecosystem with experience building modern web applications, REST APIs, and automations. Specialized in React, Astro, and TypeScript, with a strong focus on performance, SEO (Lighthouse Metrics), scalability, and clean code practices.

SKILLS

Frontend:

React, Astro, TypeScript, JavaScript, Tailwind CSS, CSS Modules, HTML5, CSS3.

Backend & APIs:

Node.js, Express, REST APIs.

Data:

SQL, PostgreSQL (Supabase), SQLite.

Tools:

Python (Playwright, Pandas), Git, GitHub, Vercel.

EDUCATION

B.S. in Information Systems

Universidad Nacional de Lanús

2025 - Present

CERTIFICATIONS

- Professional Front-End Developer – UTN BA (2025)
- Python Programming with Red Hat – Red Hat

LANGUAGES

- Spanish:** Native
- English:** B2 Level (Upper-Intermediate)

WORK EXPERIENCE

Freelance Fullstack Developer

2025 - Present

- Designed and migrated web applications for multiple independent clients using React and Astro, delivering highly interactive, 100% responsive interfaces and achieving 95+ scores on Google Lighthouse[cite: 2].
- Created and deployed REST APIs with Node.js and Express, ensuring seamless and efficient communication between client and server.
- Implemented Python scripts (Playwright and Pandas) for automated data extraction and processing workflows.
- Managed version control using Git and administered continuous deployment (CI/CD) pipelines on Vercel.

Administrative & Systems Assistant

Estudio Contable SZ, 2023 - 2026

- Designed internal Python scripts that automated tax filing processes, reducing data processing time by 35% and eliminating manual data entry errors.
- Maintained and analyzed complex financial databases utilizing SQL structures, optimizing the generation of accurate monthly reports.

FEATURED PROJECTS

Fullstack E-Commerce (Football Jerseys)

Astro, React, TypeScript, Supabase (PostgreSQL), CSS Modules

- Built a fullstack web application for managing a football jersey catalog, featuring dynamic filters and a real-time stock-managed shopping cart.
- Connected the frontend with a Supabase database (PostgreSQL), ensuring reliable data persistence and a secure user authentication system.
- Leveraged TypeScript to ensure robust data architecture and modularized user interface styles using CSS Modules.
- Developed backend business logic for the upcoming integration of an automated payment gateway.

Corporate Landing Page, Accounting Sector

Astro, React, Tailwind CSS, Vercel

- Designed a conversion-optimized corporate website, delivering a modern, fully responsive user interface adapted for mobile devices.
- Implemented Astro's island architecture alongside interactive React components for the contact form, ensuring exceptionally fast loading speeds.
- Optimized production build performance to achieve a perfect 95+ rating on Google Lighthouse.
